"Sua plataforma de streaming com melhor custo benefício e qualidade do Brasil!"

Tecnologias usadas

NORO

Qual o intuito da plataforma?

NORO

Como utilizamos o PHP no site?

```
index.php index.php
</div>
<div class="movie-list-container">
  <h1 class="movie-list-title">Novos Animes</h1>
  <div class="movie-list-wrapper">
    <div class="movie-list">
      <?php foreach ($animes as $anime) : ?>
        <div class="movie-list-item">
          
          <span class="movie-list-item-title"><?php echo $anime['nome']?></span>
          <p class="movie-list-item-desc"><?php echo $anime['descricao']?></p>
          <button class="movie-list-item-button">Assistir</button>
        </div>
      <?php endforeach; ?>
    </div>
    <i class="fas fa-chevron-right arrow"></i>
  </div>
</div>
<div class="movie-list-container">
  <h1 class="movie-list-title">Mais Populares</h1>
  <div class="movie-list-wrapper">
    <div class="movie-list">
      <?php foreach ($animes as $anime) : ?>
        <div class="movie-list-item">
          
          <span class="movie-list-item-title"><?php echo $anime['nome']?></span>
          <p class="movie-list-item-desc"><?php echo $anime['descricao']?></p>
          <button class="movie-list-item-button">Assistir</button>
        </div>
      <?php endforeach; ?>
    </div>
    <i class="fas fa-chevron-right arrow"></i>
  </div>
</div>
<div class="featured-content"
  style="background: linear-gradient(to bottom, rgba(0,0,0,0), #151515), url('https://www.acessogeek.com/wp
  Black Clover conta a história de Asta e Yuno, dois órfãos que foram abandonados
  </p>
</div>
```

NORO

Quais as vantagens do uso do PHP?

```
index.php x
index.php
175 <div class="movie-list">
176 <?php foreach ($animas as $anime) : ?>
177 <div class="movie-list-item">
178 
179 <span class="movie-list-item-title"><?php echo $anime['nome'];></span>
180 <p class="movie-list-item-desc"><?php echo $anime['descricao'];></p>
181 <button class="movie-list-item-button">Assistir</button>
182 </div>
183 <?php endforeach; ?>
184 </div>
185 <i class="fas fa-chevron-right arrow"></i>
186 </div>
187 </div>
188 </div>
189 <script src="app.js"></script>
190 </body>
191 </html>
193 </html>
```

1726 <script sr
1727 </body>
1728
1729 </html>

```
index.php x
index.php
1707 </div>
1708 <div class="movie-list-container">
1709 <h1 class="movie-list-title">Minha Lista</h1>
1710 <div class="movie-list-wrapper">
1711 <div class="movie-list">
1712 <?php foreach ($animas as $anime) : ?>
1713 <div class="movie-list-item">
1714 
1715 <span class="movie-list-item-title"><?php echo $anime['nome'];></span>
1716 <p class="movie-list-item-desc"><?php echo $anime['descricao'];></p>
1717 <button class="movie-list-item-button">Assistir</button>
1718 </div>
1719 <?php endforeach; ?>
1720 </div>
1721 <i class="fas fa-chevron-right arrow"></i>
